

Makeup with Nicole Fae

# Prepping for Your Appt

## What to wear:

Opt for attire that allows for effortless removal, avoiding the hassle of pulling it over your head. I'll require visibility of your chest and shoulders for a precise color matching.

Consider the following options:

Garments with a wide neck

Button-up tops

Zip-up apparel

A comfortable robe

For trial fittings, choose something aesthetically pleasing in a hue closely resembling your wedding dress.

# Prepping for Your Appt

## How to Prepare:

- Gather images of your preferred makeup styles
- Ensure your face is clean and exfoliated
- Feel free to apply face and lip moisturizers

I come equipped with a comprehensive kit designed for various skin types and tones. Nevertheless, bring along any specific products you'd like me to incorporate into the makeup application.

## Aftercare Tips:

I carry a compact touch-up kit, providing you with a sample-sized amount of lip product for late-day touch-ups, along with a selection of other essentials. If you wish, you have the option to purchase a full-sized lip product directly from me. Alternatively, please have your favorite lip product(s) ready during the appointment, and I'll expertly apply it before concluding our session.

# Prepping Your Home

## Where to set up:

The ideal setup location would be your dining room or kitchen. These spaces typically offer ample natural light from windows and sufficient room for all the tools and products I'll be using. Bathrooms, unfortunately, lack enough counter space or adequate standing room in front of or behind my chair. While doing makeup and hair might seem more fitting in a bathroom, for a makeup artist/hair stylist, the dining room or kitchen works better.

## How to prepare:

I will bring a chair with me. I just need a table near an outlet so that I can plug in my hot tools and a card table sized area to set up my products and tools.

# Prepping Your Home

## FAQ:

Q: Is it necessary to clean my house?

A: No need to stress about it—I won't judge! Being a mother of two myself, I understand it's challenging to maintain a spotless home. Just focus on tidying up the specific area where we'll be working.

Q: Do you bring a mirror or lighting?

A: Typically, I bring a light in case there's insufficient natural light, although it's rarely necessary. I don't require a mirror to perform my work; I bring a hand mirror for you to assess your makeup under various lighting conditions, and you can also view your hair in the large bathroom mirror once I'm finished.

Q: Are animals okay?

A: No worries—I don't have any allergies. However, to ensure the comfort of other clients, I prefer to keep cats away from my workspace and kit.
